

Welcome to the New Salice Reserved Area

We are pleased to introduce the new **Salice Reserved Area**, which replaces the previous Configurator portal and will become the single access point for Salice digital services.

First Access

- Visit www.salice.com
- Click **Reserved Area** in the top-right corner.

- Select **Register** if this is your first access to the new platform.

A screenshot of a 'New user' registration form. The title 'New user' is in orange. Below it, the text reads: 'Complete the form with the required information to create your account and access the reserved area.' At the bottom, there is a large orange button with the word 'REGISTER' in white capital letters.

- Enter your email address and complete the registration process:

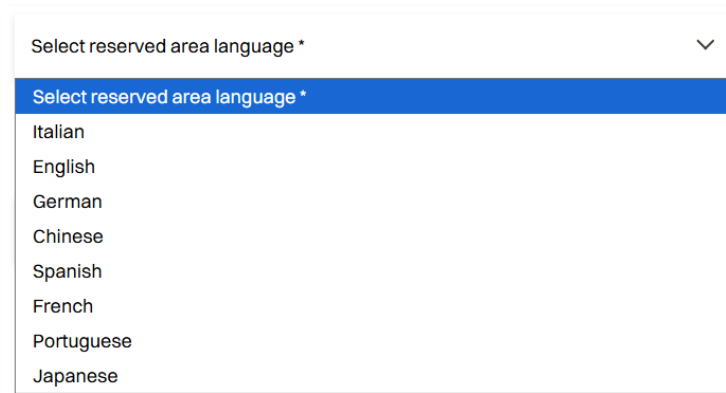

Important: If you already had an account on the previous Configurator portal, please register using the same email address. This will allow your existing account and configurations to be linked automatically.

A screenshot of the 'SALICE Create account' form. The Salice logo is at the top. Below it, the text says 'Create account' and 'Sign up to access Salice Private Area'. There is an input field for an email address, with 'configurator@salice.com' entered. To the right of the input field is a blue shield icon. Below the input field, there is a link that says 'Have an account? Sign in instead'. At the bottom, there are two buttons: 'Back' (grey) and 'Next' (blue).

Choose Your Language

During registration, you will be asked to select the language of your Private Area.

This language setting will also be applied to the available services, including the Configurator.

Access Your Services

Once registration is complete and you are logged in, you will reach your personal dashboard.

From there, you can access all available Salice digital services, including:

- Configurator
- iFurn
- Additional services that will be introduced in the future

Simply click on the desired service to access it directly.

Dashboard

Product configurator

Customise your system in every detail and obtain a complete output: application drawings, drilling plans and ready-to-use 3D files.

[GO TO CONFIGURATOR](#)

iFurn library

Browse the digital library of our products, with access to up-to-date 3D models and technical data, ready for integration into design workflows.
