

GLOW+

Glow+, a sliding system for wardrobes with 2, 3 or more overlapping doors, is now equipped with a revolutionary magnetic damping system that decelerates the opening and closing action and enables an extremely fluent and silent movement.

This innovative solution sets a new standard of silent and smooth sliding movement by eliminating the typical noise and resistance produced by spring- action dampers and enables the door to be easily opened.

Glow+ can be used both with wooden doors and aluminium-framed doors, with a max. weight of 70 kg. With the use of an optional additional strengthening kit, the system can carry doors up to 100 kg.

The Glow+ assembly is very easy and intuitive. It can be installed with screws or automatically with pressure-fixed clips.

The system can also be equipped with a magnetic cover that allows for a further aesthetic enrichment.

Glow+ can be used in a host of application and is particularly suitable in living rooms and in bedroom wardrobes.
