

GLOW+ AVAILABLE WITH 6-HOLES CARRIAGES

Glow+, the sliding system for wardrobes with 2, 3 or more overlapping doors, equipped with a revolutionary magnetic damping system that decelerates the opening and closing action, considerably increases its versatility.

The system, in fact, is now available with new 6-holes carriages, which extends its compatibility with the systems of the competitors Caimi and Mixal, without requiring any additional machining or modification of the doors.

This development thereby enables the innovative Glow+ system to improve and modernise the sliding system of any wardrobe.

The carriages are available for door height from the ground of 17 mm and 33 mm and for door thickness between 23 mm and 50 mm.

Glow+ can be used both with wooden doors and aluminium-framed doors, with a max. weight of 70 kg. and delivers an extremely fluent and silent smooth sliding movement. This system is particularly suitable in living rooms and in bedroom wardrobes.
