Slider S20

S20 is a coplanar system for kitchen cabinets and wall cabinets with doors weighing up to 20 kg. Thanks to the exclusive patented design of the Slider series, door movement and cushioned opening and closing are intuitive, smooth and silent. For some applications, **S20** can be provided with a customisable front cover and the Push system. The latter allows you to open the unit by simply pressing the door: this eliminates the handle leaving you greater design freedom.

Due to its features, **S20** is ideal for cabinets used in the living area, offices, kitchen and sleeping area.

Slider S20
