

## Slider L100

**Slider L100** is the coplanar system for cabinets with doors weighing up to 100 kg. Based on L70, it pushes the limits further, delivering the smoothness and lightness of touch typical of Salice even with particularly heavy doors.

Available in two- or three-door variants, it can be specified with a customisable front cover. Its features of reliability, modularity and capacity make **L100** ideal for wardrobes in bedrooms and for all large cabinets in general.

## Slider L100

### Technical information

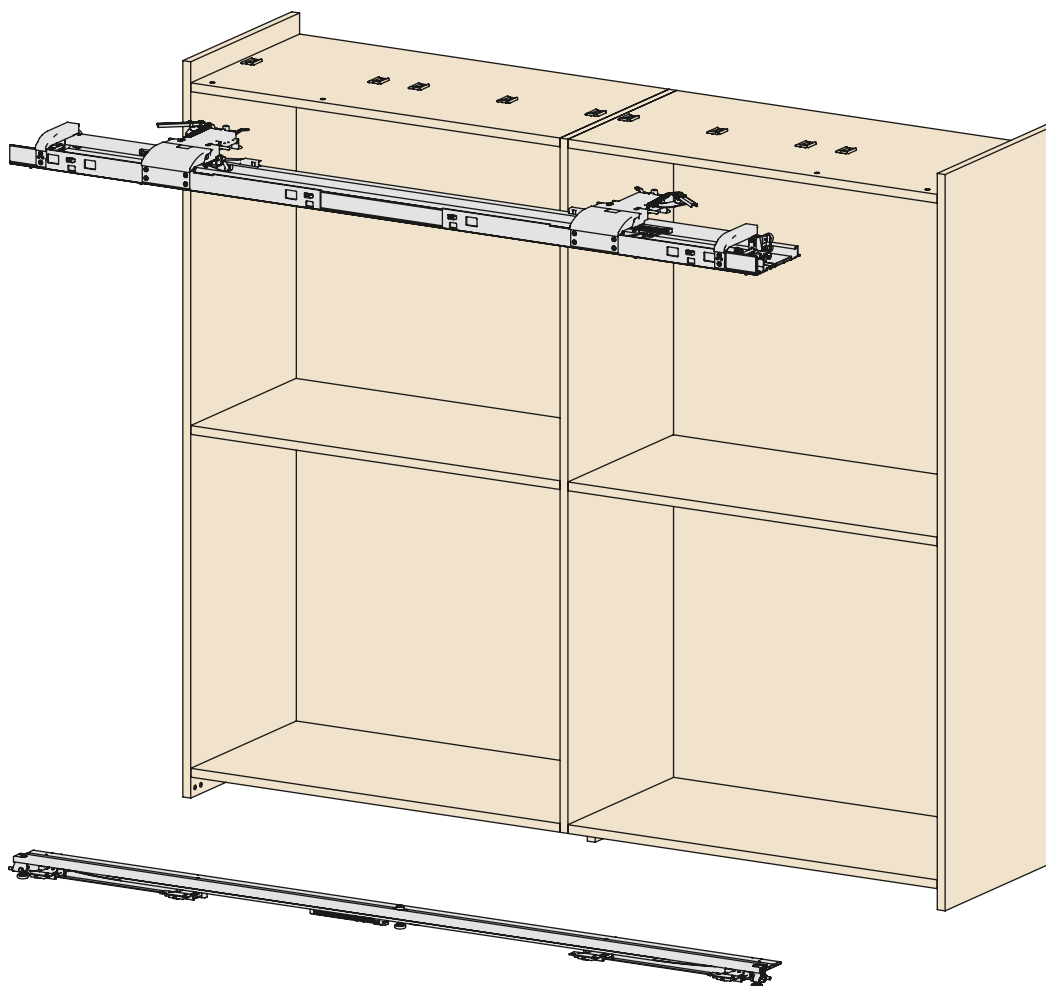

Coplanar two-door cushioned sliding system.  
Capacity 100 kg per door.
