

Futura Push synchroniser

SALICE

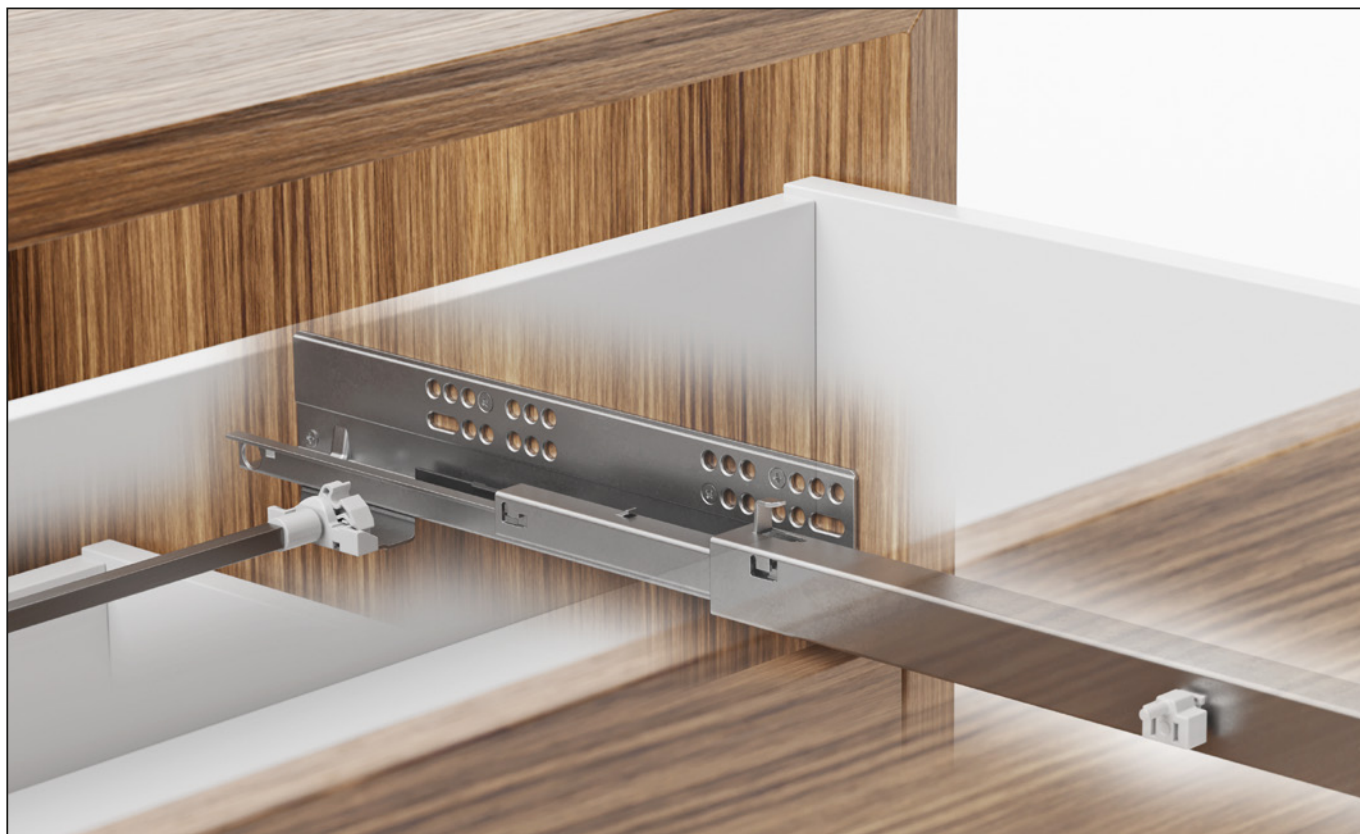

Futura Push synchroniser

The synchronisation system for Push-open Futura runners has been developed to ensure that drawers of any width can be opened with minimum effort.

The system links the two runners, which thus become a single element; a pressure at any point of the drawer frontal (even at the extremities), is sufficient for the Push devices to release and consequently for the drawer to self-open.

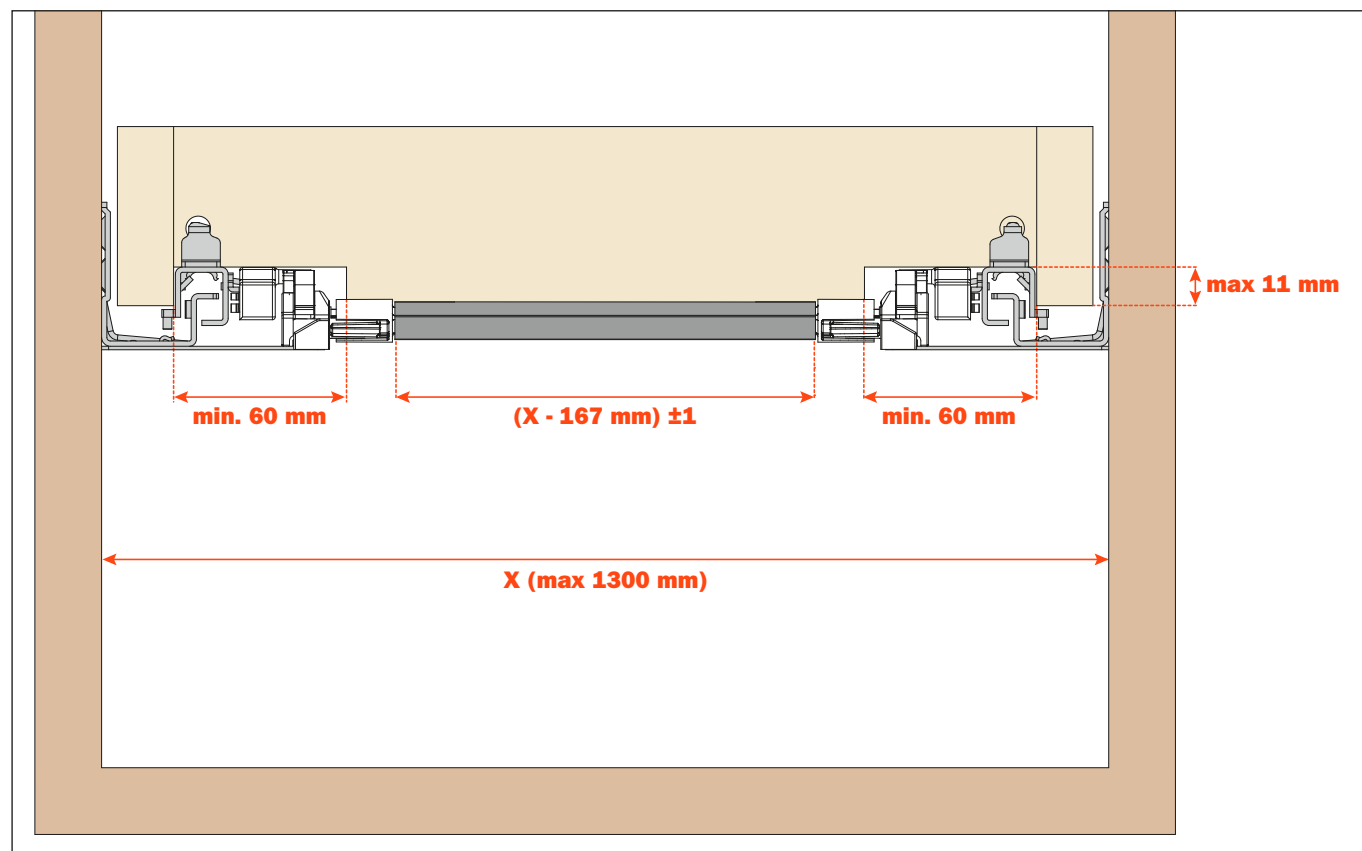

The synchroniser can be used with any drawer width; its functionality is at its best with wider drawers.

It can be used on drawers of any width; however it is recommended for drawers over 80 cm in width.

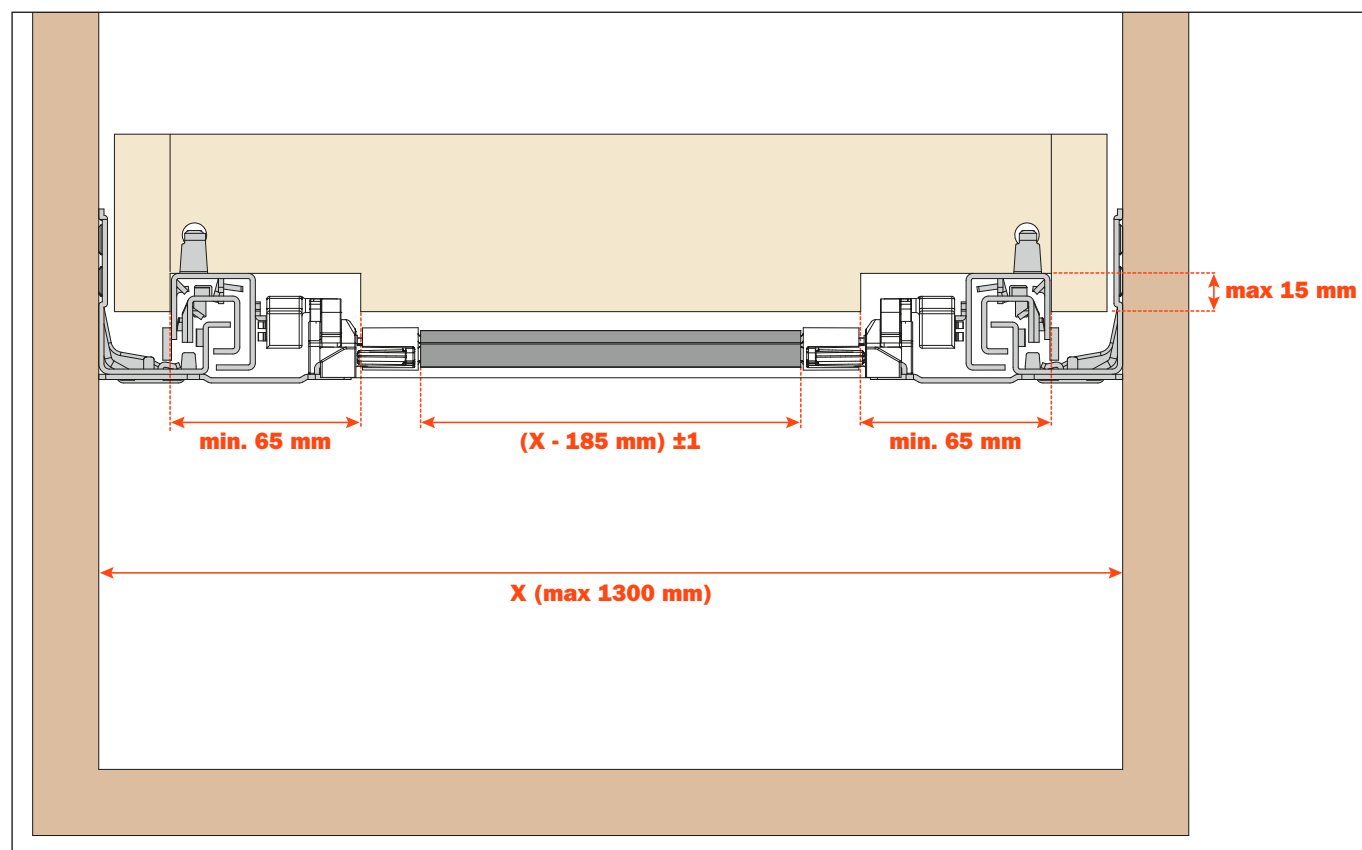

Part-extension

The assembly of the synchroniser requires a minimum 60 mm groove in the rear of the drawer.

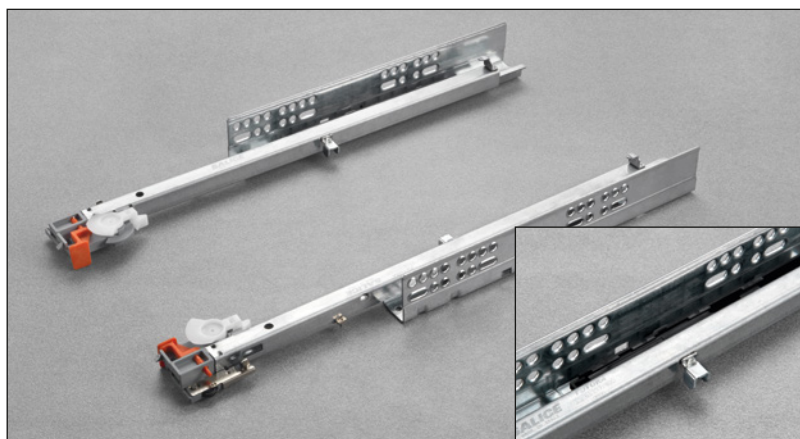

Full-extension

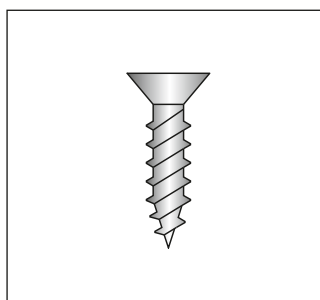

The assembly of the synchroniser requires a minimum 65 mm groove in the rear of the drawer.

Futura Push 61277

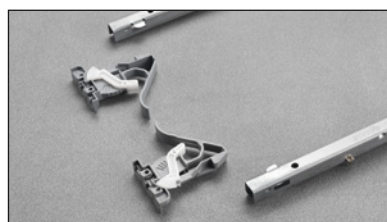

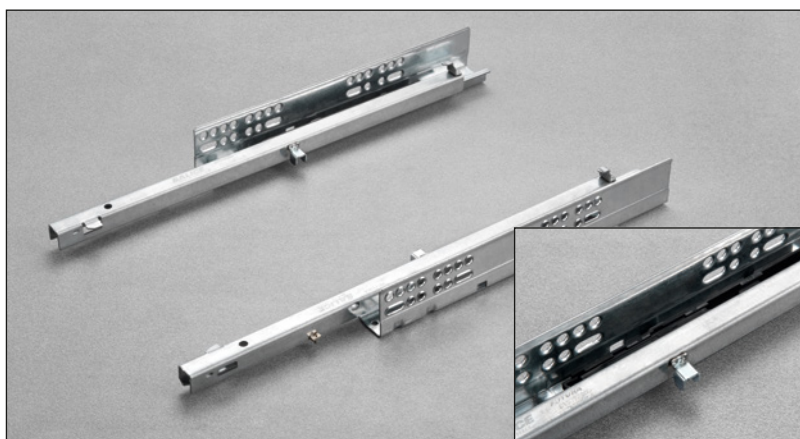

Part number

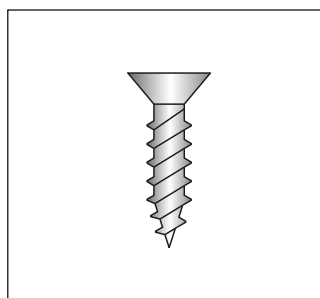

To be screw fixed
Screw TSP $\varnothing$ 3,5 mm

BASIC PART NUMBER	RUNNER LENGTH (LN)	=	MIN. DEPTH OF THE CABINET (PM)

Fitting the driver pins to the runners

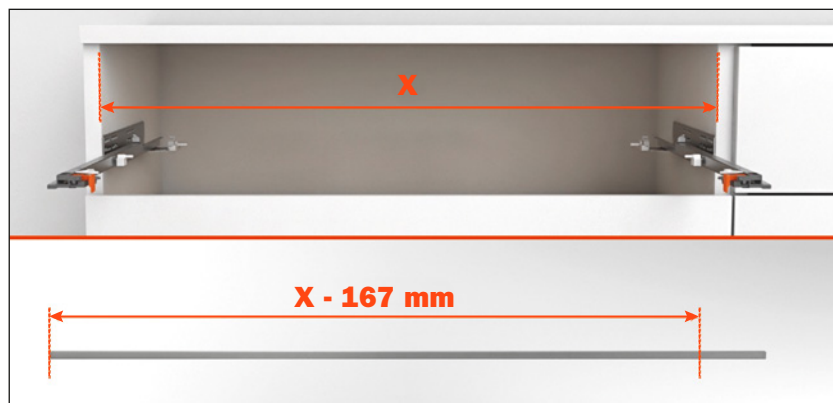

Slide the carrier plates into position on the runners in the direction indicated by the arrows

Screw-fix the runners to the cabinet side

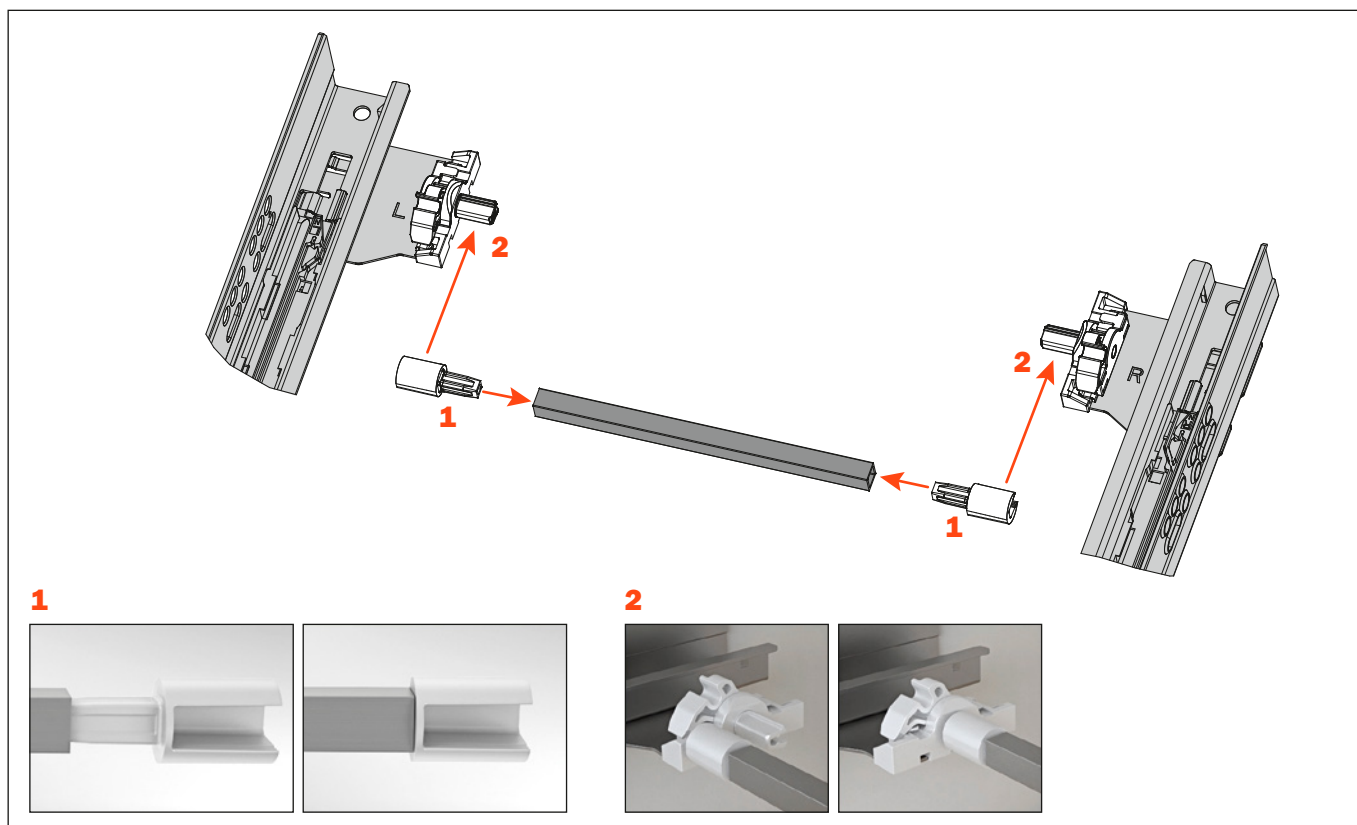

Cut the stabiliser bar to length

Assembly instructions

1. Press the end caps onto the bar
2. Fix the bar to the plates

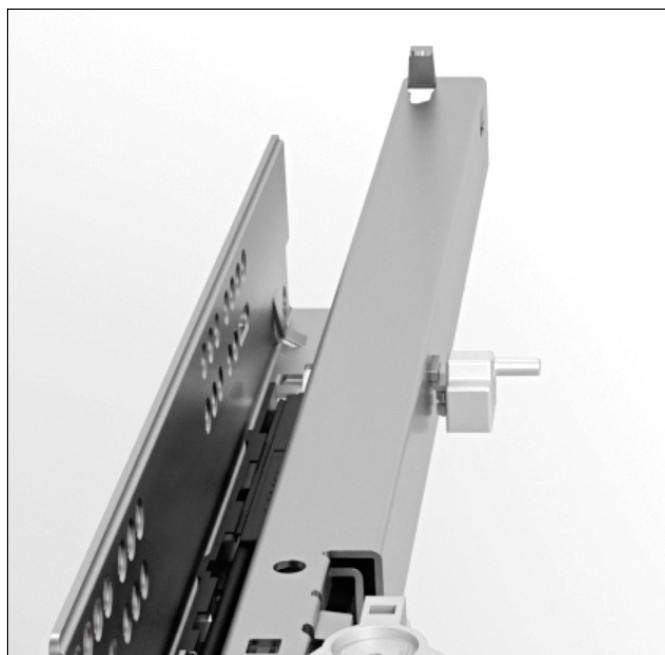

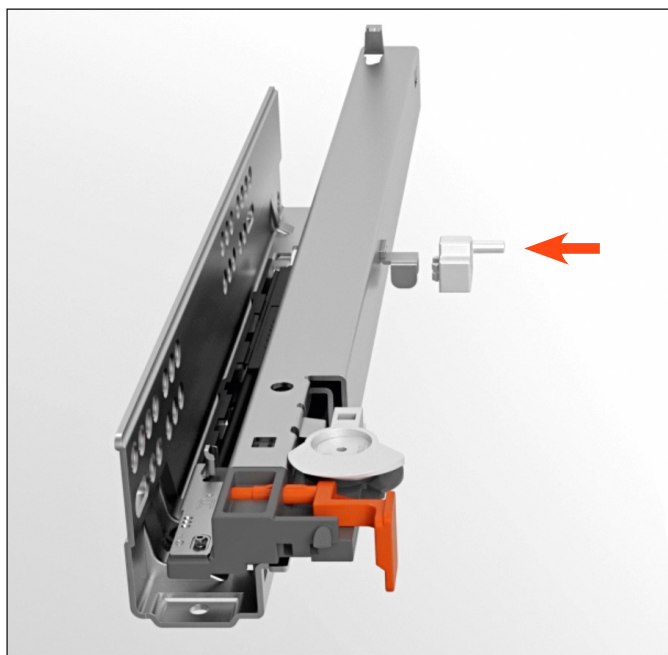

Insert the drawer

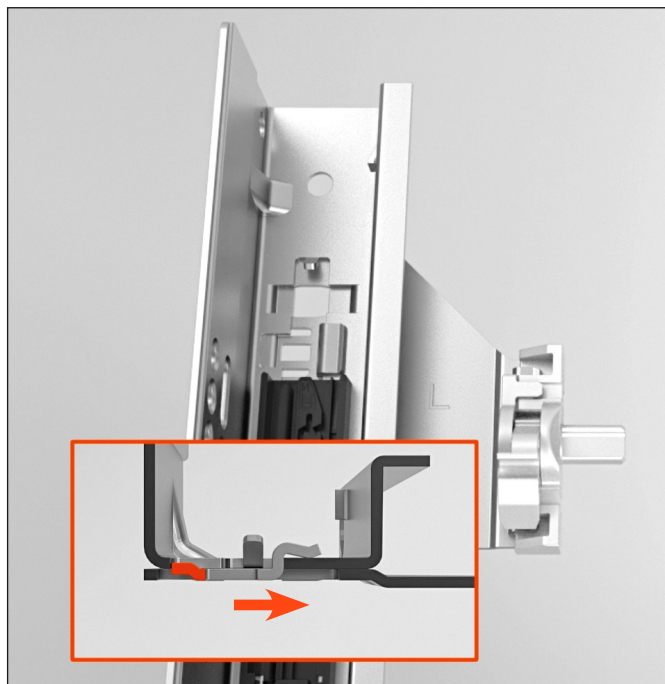

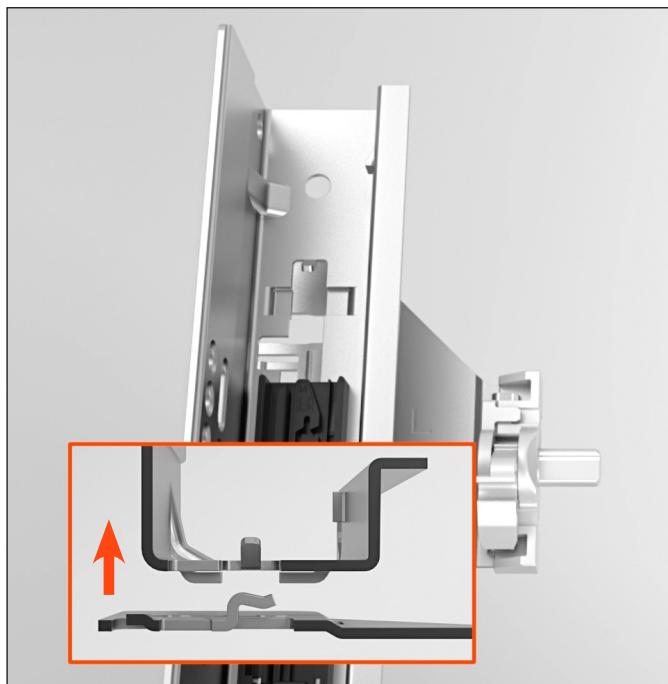

A pressure at any point on the drawer frontal is sufficient for the drawer to self-open
