

A NEW GENERATION OF AIR

Increased versatility and application range

From its first introduction, Air, the concealed hinge by Salice has been recognised as a highly innovative and functional product. It has now been updated to offer greater versatility and to increase its range of applications.

The new generation Air, which completely replaces the previous version, can be used on doors of larger dimensions with a maximum height of 2700 mm and a maximum weight of 25 kg.

The refined aesthetics, its compactness and small size, and the unique and distinctive features of the Air hinge, which are widely appreciated and internationally recognised, remain unchanged.
