Adapto

Adapto

Precision in movement, excellence in runners.

- System with four adjustments: side, height and tilt adjustments directly on the drawer; depth adjustment via clips.
- A uniform drawer front drilling pattern for all heights, designed to optimise workflows and reduce production variables.
- Full compatibility with Progressa, Progressa+ and Futura runners for stability and fluid movement at the top of their class.

Space with boundless elegance.

- A clean, essential design in true Salice style, available in four elegant finishes (Signal White, Silk Grey, Dusty Grey and Traffic Black).
- Available in a 2-sided configuration, in three standard heights, complemented by stacked elements and railing.
- Quick-fixing drawer sides for simple assembly, fast installation steps and a high perceived quality.

Adapto

Adapto

Precision in movement, excellence in runners.
Developed to integrate seamlessly with Progressa, Progressa+ and Futura runners, Adapto ensures fluid, silent movement that remains consistent over time.

Its advanced engineering and integrated three-dimensional adjustments enable millimetre-precise alignment and impeccable stability, while simplifying industrial drilling and assembly processes.

Adapto

Adapto

Space with boundless elegance.
With its thin sides and clean, understated aesthetics, Adapto transforms the drawer into a discreet, refined furnishing element.

The extensive modularity of the range, with different heights, matt finishes and special configurations, offers maximum design freedom, adapting naturally to kitchens, living rooms, bathrooms and bedrooms.
