SALICE

SILENTIA+ Integrated soft-close mechanism

The precision of movement, the value of durability.

Silentia+ incorporates an advanced silicone-oil soft-close mechanism in the hinge cup, ensuring a consistently smooth, fluid and quiet closing movement. Thanks to the adjustable switch, the hinge adapts with exceptional accuracy to the dimensions and weight of any door, reducing impact noise and ensuring flawless, consistent performance over time.

Invisible excellence serving the design.

Designed to integrate discreetly into the cabinet, Silentia+ preserves the clean appearance of the cabinet side. Full compatibility with the range of mounting plates and accessories, combined with fast and precise three-dimensional adjustments, provides maximum design flexibility and unrivalled ease of installation.
