SALICE

ADAPTO

Precision in movement, excellence in runners.

Developed to integrate seamlessly with Progressa, Progressa+ and Futura runners, Adapto ensures fluid, silent movement that remains consistent over time. Its advanced engineering and integrated three-dimensional adjustments enable millimetre-precise alignment and impeccable stability, while simplifying industrial drilling and assembly processes.

Space with boundless elegance.

With its thin sides and clean, understated aesthetics, Adapto transforms the drawer into a discreet, refined furnishing element. The extensive modularity of the range, with different heights, matt finishes and special configurations, offers maximum design freedom, adapting naturally to kitchens, living rooms, bathrooms and bedrooms.
