For small or light doors, 105° opening  page 9

Silentia+ 200 Series
Series for thick doors or 0 protrusion, 94° and 155° opening  page 17

Silentia+ 700 Series
110° opening  page 27

Accessories  page 37
The state of the soft-close art.

Silentia+ allows a perfect and constant closing of the door in any temperature, use and application.

The innovative soft-close technology guarantees excellent performances to the complete range of hinges. Silentia+ includes numerous technological elements in the required spaces and maintains the aesthetics of the hinges of the first generation.

Silentia+ Features and Benefits

- Integrated soft close by means of twin fluid dampers
- Adjustment switch to set a comfortable soft close action
- Impervious to temperature extremes
- Very smooth opening with minimal resistance
- Patented compensating parallel side adjustment
- Available in the 700 Series, 100 Series and 200 Series
- Available in all Salice fixing types (Screw, Dowel, Rapido, Logica)
- Available in Nickel or Titanium finish
- Exceeds ANSI/BHMA standards A156.9-2015
- Limited Lifetime Warranty
Second generation

Integrated soft-close technology with two fluid dampers.

The two integrated dampers guarantee an exceptional consistency of the decelerating strength providing a perfect closing to any kind of door, size and application.
**Always-optimal soft-close action**

Silentia+ is also equipped with the innovative switch to adjust the soft close action. The activation of this switch allows, even with special door sizes, to obtain the ideal decelerating speed.

With the adjustment switch set showing the +, the soft close engages at 30° and with the - adjustment switch set showing the - soft close engages at 10°.
Silentia+ • 100 Series for small or light doors
Silentia • 100 Series for small or light doors

Integrated soft close by means of twin fluid dampers

• Adjustment switch to set a comfortable soft close action
• Impervious to temperature extremes
• Very smooth opening with minimal resistance
• Patented compensating parallel side adjustment
• Available in all Salice fixing types (Screw, Dowel, Rapido, Logica)
• Available in Nickel or Titanium finish
• Exceeds ANSI/BHMA standards A156.9-2010

Constant “L” value of 1.5 mm (it does not change during side adjustment).

The number of hinges required depends on the size, weight and material of the door.

The distance between the top and bottom must be greater than the width of the door.

Additional hinges should be added if doors are near the border of the line of size or weight chart. Use the diagram below to determine the number of hinges.

Adjustments

Parallel side adjustment from -1.5 mm to +4.5 mm.
Height adjustment ±2 mm
Depth adjustment with Domi snap-on mounting plates from -0.5 mm to +2.8 mm.
Depth adjustment with 200 Series mounting plates +2.8 mm. Anti-sliding safety stop.

Mounting plates

Snap-on assembly on Domi mounting plates.
Symmetrical and asymmetrical bright nickel plated steel or die-cast Series 200 mounting plates.
Positioning with pre-determined stop on traditional 200 Series mounting plates.

Note: Use No. 2 Pozi drive screwdrivers for all adjustments.
Use this table to identify the available attachment options to the door. Fill the third position of the hinge code number with the letter or the number corresponding to your choice. I.e.: C1_6AE9.

Fill this position with the chosen letter or number.

105° opening and complementary hinges
### Technical information

Hinges with adjustable integrated soft-close mechanism operated by twin fluid dampers housed in the hinge cup. The decelerating effect is adjusted by using a simple switch. Minimum 15 mm / maximum 20 mm door thickness.

Hinges for small/light door material or heavy front profiles 12 mm deep cup.

105° opening.

Possible drilling distance on the door (K): from 3 to 6 mm.

Compatible with all traditional 200 Series mounting plates and with all Domi snap-on mounting plates.

### Space needed to open the door

<table>
<thead>
<tr>
<th>T=</th>
<th>15</th>
<th>16</th>
<th>17</th>
<th>18</th>
<th>19</th>
<th>20</th>

<td>1.1</td>
<td>1.2</td>
<td>1.4</td>
</tr>
</tbody>
</table>

The above values are calculated on doors with a 1 mm radius. They are reduced if the doors have greater radiussed edges.

### Protrusion of the door

Protrusion of the door from the cabinet side at the max. opening. The figures are based on a straight arm hinge, H=0 mm thickness of mounting plate and K value = 3 mm.

### “C” value

With this formula you can obtain the max. thickness of the moulded door that can be opened without touching adjacent cabinet sides, doors or walls, while bearing in mind the above $L \cdot K \cdot T$ values.

$$C = 20.5 + K + A$$

### Abbreviations:

| S  = Thickness of the cabinet side          | A  = Reveal                  |
| D  = Required door overlay                  | L  = Gap between the door    |
| T  = Door thickness                         | H  = Height of the mounting  |
| K  = Drilling distance                       | G  = Hinge constant          |
Use these formulas to determine the type of hinge arm, the drilling distance “K” and the height of the mounting plate “H” which is necessary to solve each application problem.

Use the tables “Drilling and attachment” at page 11 to complete the code number of the desired hinge.

To limit the opening of the hinge, see page 40, chapter “Accessories”.

*Check with your Salice sales representative or customer service for specific Titanium availability.

The above values are calculated on doors with a 1 mm radius edges. They are reduced if the doors have greater radiussed edges.

Protrusion of the door

Protrusion of the door from the cabinet side at the max. opening. The figures are based on a straight arm hinge, H=0 mm thickness of mounting plate and K value = 3 mm.

“C” value

With this formula you can obtain the max. thickness of the moulded door that can be opened without touching adjacent cabinet sides, doors or walls, while bearing in mind the above L•K•T values.

\[ C = 22.5 + K + A \]

Abbreviations:

<table>
<thead>
<tr>
<th>S</th>
<th>Thickness of the cabinet side</th>
</tr>
</thead>
<tbody>
<tr>
<td>D</td>
<td>Required door overlay</td>
</tr>
<tr>
<td>T</td>
<td>Door thickness</td>
</tr>
<tr>
<td>K</td>
<td>Drilling distance</td>
</tr>
<tr>
<td>L</td>
<td>Gap between the door and cabinet</td>
</tr>
<tr>
<td>H</td>
<td>Height of the mounting plate</td>
</tr>
<tr>
<td>G</td>
<td>Hinge constant</td>
</tr>
</tbody>
</table>
Use these formulas to determine the type of hinge arm, the drilling distance “K” and the height of the mounting plate “H” which is necessary to solve each application problem.

Use the tables “Drilling and attachments” at page 29 to complete the code number of the desired hinge.

To limit the opening of the hinge, see page 40, chapter “Accessories”.

**Packing** • Boxes 300 pcs. • Pallets 7,200 pcs.
Packing • Boxes 150 pcs. • Pallets 3,600 pcs.

The solution of assembly problems where doors are mounted at a positive angle requires the verification of drilling distances by a practical trial. Please do not hesitate to consult our technical support department for assistance.

Use the tables “Drilling and attachment” at page 29 to complete the code number of the desired hinge.

Technical information

Hinges with adjustable integrated soft-close mechanism operated by twin fluid dampers housed in the hinge cup. The decelerating effect is adjusted by using a simple switch.

For doors with positive angled assembly.
Minimum 16 mm thick doors.
13.5 mm deep cup.
110° opening.
Possible drilling distance on the door (K): from 3 to 6 mm.
Compatible with all traditional 200 Series mounting plates and with all Domi snap-on mounting plates.

The solution of assembly problems where doors are mounted at a negative angle requires the verification of drilling distances by a practical trial. Please do not hesitate to consult our technical support department for assistance.

Use the tables “Drilling and attachment” at page 29 to complete the code number of the desired hinge.

Technical information

Hinges with adjustable integrated soft-close mechanism operated by twin fluid dampers housed in the hinge cup. The decelerating effect is adjusted by using a simple switch.

For doors with negative angled assembly. Minimum 16 mm thick doors. 13.5 mm deep cup. 110° opening.

Possible drilling distance on the door (K): from 3 to 6 mm. Compatible with all traditional 200 Series mounting plates and with all Domi snap-on mounting plates.

Flange cover caps

*Check with your Salice sales representative or customer service for specific Titanium availability

S2XX85H9 - Nickel
S2XX85H6 - Titanium

Steel flange cover cap, it can be personalized on request.

For all 100, 200, 700 Series.

Min order quantity of 10,000 and a lead time of 10 weeks is required for personalized printed cover caps.

S2CX85H9 - Nickel
S2CX85H6 - Titanium

Steel flange cover cap with embossed logo.

For all 100, 200 and 700 Series.

Min order quantity of 10,000 and a lead time of 10 weeks is required for personalized embossed cover caps.

Spacers and gauge for Silentia hinges

S2XF86

Spacer to reduce the drilling depth for 155° hinges.

S2XF86BT = 0.6 mm
S2XF86AT = 1.2 mm
S2XF86KT = 1.8 mm

S2XX86

Spacer to reduce the drilling depth for 94°, 105° and 110° hinges.

S2XX86BT = 0.6 mm
S2XX86AT = 1.2 mm
S2XX86KT = 1.8 mm

D_A_AC_SN

Gauge to check the diameter and the depth of the drilling.

D1A6AC3SN = 12 mm
D2ABACGSN = 15.5 mm
D7A6ACYSN = 13.5 mm

Screwdriver

D2A7X5XCP

Pozi screwdriver
