Progressa

Introducing **Progressa**, a cutting-edge generation of high-performance, full extension undermount drawer runners that redefine precision and durability.

Crafted using state-of-the-art technology, these runners feature our proprietary “S-Drive” progressive module, ensuring an unparalleled level of functionality.

With static load capacities ranging from 55 kg on **Progressa** to an impressive 78 kg on **Progressa+**, and dynamic loads spanning from 45 kg to 70 kg *, these runners deliver robust strength and reliability.

The rack and pinion action guarantees impeccable synchronization, silent movement, and optimal stability for a seamless user experience.

Innovative adjustable clips set **Progressa** apart, facilitating effortless side, depth, and height adjustments and offering versatility across a wide array of applications. Additionally, each runner provides an optional tilt adjustment for enhanced customization.

Progressa runners are available in Soft Close, Integrated Push-to-Open and Shelf versions.

They cover a length range between 250 mm and 750 mm, in 50 mm increments, with drawer side material thicknesses between 13 mm and 16 mm and from 350 mm to 750 mm, in 50 mm increments, with drawer side material thicknesses 18-19 mm.

Compatible with drawer side material thicknesses between 13 mm and 16 mm and 18-19 mm.

Elevate your drawer experience with **Progressa**, where precision meets innovation.

Smove

In the Smove version, the **Progressa** and the **Progressa+** runners are equipped with a fully integrated soft close system that decelerates the closing action of the drawer.

*tests performed according to the DIN EN 15338 standard

The **Progressa** and the **Progressa+** runners are also available with integrated Push opening system, for all handle-less drawers.
A slight pressure of the drawer front is sufficient for the Push mechanism to release and consequently for the drawer to self-open with minimum effort.

Synchronizer for Progressa Push, Progressa+ Push and Progressa+ Shelf Push runners (Optional)

The synchronization system has been developed to ensure that wider drawers can be opened with minimum effort. Applying pressure on any part of the drawer front (even at the extremities), is sufficient for the Push devices to release and consequently for the drawer to open.

Progressa

Front locking devices

A full range of fixing clip options, ranging from stamped steel adjustable locking devices with intuitive side and depth adjustments to locking devices with front and side fixing for more competitive markets.

Rack system

All versions and lengths of **Progressa** have our integrated “S-Drive” system, which synchronizes the sliding elements and guarantees a true progressive action, excellent lateral stability, with any drawer size, and a perfectly silent movement without the need for further components.

Runner installation

For all Progressa and Progressa⁺ runners

Mounting full-extension runner on the cabinet side

Screws, see page 72.

If runners are mounted before the assembly of the cabinet, we recommend that the inset position of the runner be increased from 38 to 39 mm to accommodate the manufacturing tolerances in the cabinet and the runner.

The oval slots on the runners enable a depth adjustment of ± 4.5 mm and a height adjustment of ± 6 mm to be made.

These adjustments are in addition to those incorporated in the fixing clips and in the runner (**Adjustments**, see page 23).

Drilling positions for runner on cabinet side

For all Progressa and Progressa+ runners

Please refer to the specific product pages in this catalog for all technical data

The use of at least 4 fixing screws for each runner to the cabinet side is highly recommended.

Load capacity may vary on longer lengths.

Drawer dimensions and drilling

For all Progressa and Progressa+ runners

RUNNER LENGTH (LN)	External DRAWER DEPTH (LC)
250 mm	240 mm
300 mm	290 mm
350 mm	340 mm
400 mm	390 mm
450 mm	440 mm
500 mm	490 mm
550 mm	540 mm
600 mm	590 mm
650 mm	640 mm
700 mm	690 mm
750 mm	740 mm

Abbreviations

SP = Drawer thickness
LC = Drawer depth
PM = Cabinet depth
X = Cabinet internal width
LN = Nominal runner length

Full-extension runner for **13 mm to 16 mm** drawer material thickness

The internal width of the drawer is 42 mm to 43.5 mm less than the internal width of the cabinet

The external drawer depth is 10 mm less than the runner length

For drawer sides with sub-fronts between 12 and 13 mm, we recommend the use of the build-up spacer **AFSFXB**.

See page 70 for specs.

SP = Drawer thickness

Full-extension runner for **18-19 mm** drawer material thickness

The internal width of the drawer is 48 mm to 49.5 mm less than the internal width of the cabinet

The external drawer depth is 10 mm less than the runner length

Drawer drilling

For all Progressa and Progressa⁺ runners

3-SIDED drawer

4-SIDED drawer

REAR HOOK

Use **drilling templates** for rear hook, see page 65 and 67.

REAR NOTCH with Smove and Push runners

REAR NOTCH with Push Synchronizer and tilt adjustment lever

Progressa Push Synchronizer, see page 62.
AGLRXX3F Tilt adjustment lever, see page 70.

Technical information

For Progressa+ Shelf runners

Plan view - Full-extension

RUNNER LENGTH (LN)	X
350 mm	305 mm
400 mm	305 mm
450 mm	320 mm
500 mm	382.5 mm

Dimensions

With larger shelves, it is possible to increase the number of runners in order to improve the load capacity and the stability.

Technical information - Rear hook

For Progressa+ Shelf runners

**Assembly on the pull-out shelf
with a 12 mm minimum thickness**

Rear hook bracket **AGAPXXYI**

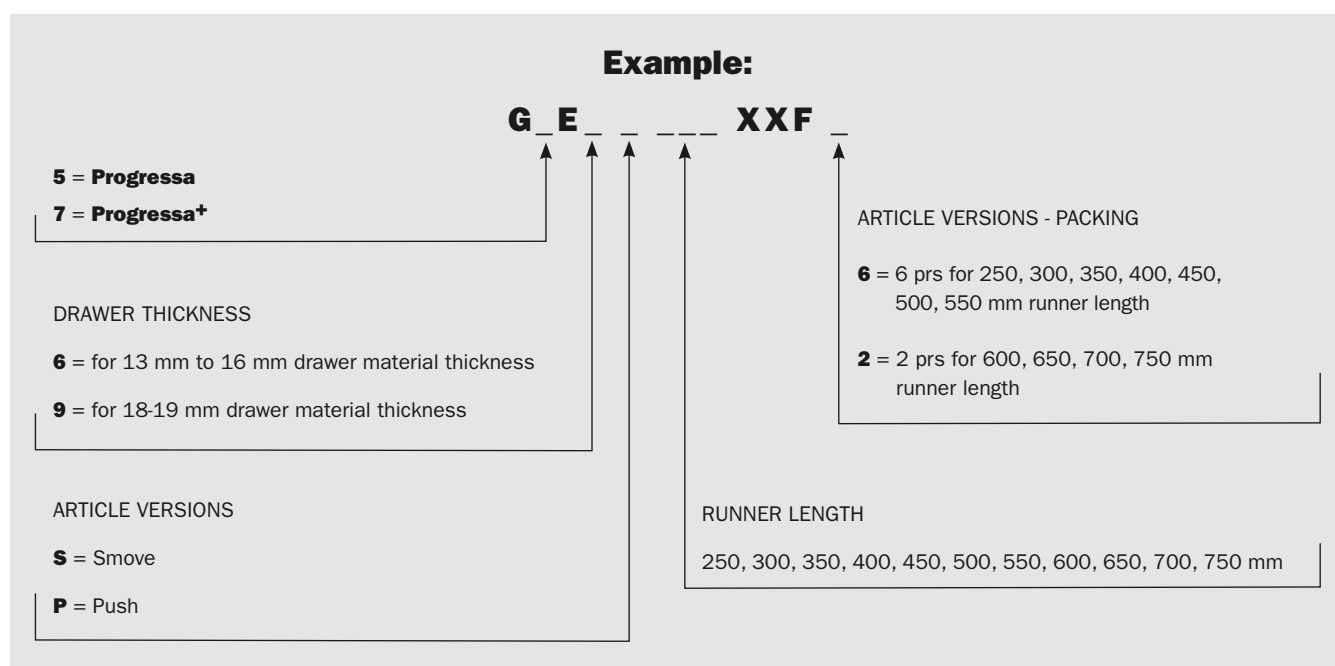

Y1 = Min. 50 mm

**Assembly on the pull-out shelf
with a 16 mm minimum thickness**

Y1 = Min. 50 mm

Part number composition - For Progressa and Progressa+ runners

Front locking devices

Front locking devices - Side and depth adjustments

For all Progressa, Progressa+ and Progressa+ Shelf runners

- Dual steel/fiber glass-nylon construction
- Compatible with all Progressa runners
- Tool free lateral and depth adjustments
- Pre-drilling recommended \varnothing 2.5 mm

AFCGXX3B

PACKING

2 boxes = 100 pcs right and 100 pcs left

Assembly to the bottom

Assembly to the drawer

Use **drilling templates ASGD704U3XA** for accurate installation of the clips, see page 65.

Front locking devices - Front and side fixing

For all Progressa, Progressa+ and Progressa+ Shelf runners

- Engineered thermoplastics
- Compatible with all Progressa runners
- Side fixing option
- Pre-drilling recommended \varnothing 2.5 mm
- Minimum inside drawer width 130 mm
- Minimum inside cabinet width 172 mm

AFCEX56B

PACKING

2 boxes = 100 pcs right and 100 pcs left

Assembly to the bottom

Assembly to the drawer

Use **drilling template ASGD504U6XA** for accurate installation of the clips, see page 67.

Drawer removal

Standard locking device - Side and depth adjustments

For all Progressa, Progressa+ and Progressa+ Shelf runners

Position hands under the front of the drawer and press on the orange levers, as indicated in the drawing, sliding the drawer out of the cabinet.

Standard locking device - Front and side fixing

For all Progressa, Progressa+ and Progressa+ Shelf runners

Position hands under the front of the drawer and press on the black levers, as indicated in the drawing, sliding the drawer out of the cabinet.

Adjustments

Side adjustment +/- 1.5 mm

For all Progressa, Progressa+ and Progressa+ Shelf runners

Rotate the white wheel towards the drawer front to adjust left.
This operation is tool free.

1.5 mm

Rotate the white wheel towards the back of the drawer to adjust right.
This operation is tool free.

1.5 mm

For side adjustment, it is recommended that the wheels on the clips are operated in the same direction, in order to maintain the correct alignment and movement of the runners.

Depth adjustment +/- 3 mm

For all Progressa, Progressa+ and Progressa+ Shelf runners

Rotate the white wheel (see drawing) towards the outside of the drawer to increase the gap between the front and the side.

This operation is tool free.

+ 3 mm

Rotate the white wheel (see drawing) towards the inside of the drawer to reduce the gap between the front and the side.

This operation is tool free.

- 3 mm

Height adjustment + 2.5 mm

For all Progressa, Progressa+ and Progressa+ Shelf runners

Push the lever towards the inside of the drawer to achieve height adjustment.
This operation is tool free.

2.5 mm

Assembly of tilt adjustment levers (optional)

For all Progressa and Progressa+ runners

Pull out the drawer and remove the plastic insert, both right and left.

Insert the tilt adjustment levers **AGLRXX3F**, both right and left.

Rotate the lever to adjust.

Tilt adjustment + 3 mm

Open the drawer (1) and press the lever towards the back of the cabinet (2) to achieve the adjustment.
Maximum 3 mm rise of drawer back (tool free).

Drawer back preparation, see page 10.
AGLRXX3F tilt adjustment lever, see page 70.

Progressa Smove

Progressa - Full extension runner for 13 mm to 16 mm drawer material thickness Smove

SMOVE: SOFT CLOSE MECHANISM FULLY INTEGRATED INTO THE DRAWER RUNNER

Product features

- 45 Kg Dynamic load capacity
- Available in lengths ranging from 250 mm to 550 mm in 50 mm increments
- Full extension with a synchronized mechanism
- Enhanced smooth soft closing action
- Elongated holes for depth and height adjustment
- Adjustable clips allow for easy drawer insertion and removal
- Tool free height adjustments + 2.5 mm
- Tool free depth adjustments +/- 3 mm
- Tool free side adjustments +/- 1.5 mm
- Optional tool free tilt adjustment +3 mm
- 13 mm to 16 mm drawer material thickness
- Compatible with Lineabox Easy drawers
- Finish: bright zinc-plated
- 100% Made in Italy

Progressa+ - Full extension runner for 18-19 mm drawer material thickness

Push

PUSH: THE OPENING SYSTEM FOR HANDLE-LESS DRAWERS IS FULLY INTEGRATED IN THE RUNNER.
A SLIGHT PRESSURE OF THE DRAWER FRONT IS ENOUGH FOR THE DRAWER TO OPEN.

Product features

- 70 kg Dynamic load capacity
- Available in the full range of lengths from 350 mm to 750 mm in 50 mm increments
- Full extension with a synchronized mechanism
- Integrated Push opening system
- Elongated holes for depth and height adjustment
- Adjustable clips allow for easy drawer insertion and removal
- The drawer is latched when closed
- Frameless or blocked out face frame applications
- Tool free height adjustments + 2.5 mm
- Tool free depth adjustments +/- 3 mm
- Tool free side adjustments +/- 1.5 mm
- Optional:
 - tool free tilt adjustment +3 mm
 - Push Synchronizer
- 18-19 mm drawer material thickness
- Compatible with Lineabox Easy drawers
- Finish: bright zinc-plated
- 100% Made in Italy

Accessories

Progressa Push Synchronizer bar

The synchronization system for **Progressa Push**, **Progressa+ Push** and **Progressa+ Shelf Push** runners has been developed to ensure that wider drawers can be opened with minimum effort, regardless of where pressure is applied. The system links the two runners, which then become a single element; applying pressure on any part of the drawer front (even at the extremities), is sufficient for the Push devices to release and consequently for the drawer to open.

The synchronization can be used with any drawer width; its functionality is at its best with drawers wider than 800 mm.

PRODUCT FEATURES:

- smooth and progressive running action
- runner load capacity remains unchanged
- available on **Progressa Push** runners, except for lengths 250 and 300 mm, and on any **Progressa+ Push** and **Progressa+ Shelf Push** runners length
- minimum opening (X) = 280 mm
- maximum opening (X) = 1305 mm
- bar length = 1150 cut to size

Technical information - Formula for cutting the bar to length

The assembly of the synchronizer requires a minimum 76 mm notch in the rear of the drawer

X = Internal width of the cabinet

Assembly instructions

Insert and slide the carrier plates into position on the runners in the direction indicated by the arrows

Fitting the driver pins to the runners

Cut the synchronizer bar to length

Progressa Push synchronizer bar - Assembly instructions

Fix the bar to the plates and insert the drawer

Applying pressure on any part of the drawer front is sufficient for the drawer to open

Packing

SINGLE KIT PACKING

APKF7X51150

PACKING

1 box = 20 single kits

1 KIT CONTAINS:

- 1 stabilizer bar
- 2 driver pins
- 1 right carrier plate and 1 left carrier plate

Drilling templates for drawers - For all Progressa, Progressa+ and Progressa+ Shelf runners

Pre-drilling for the clips reduces the possibility of splitting the wood, thus assuring the correct and level installation of the clips.

The correct and level mounting assures a smooth assembly and operation of the drawer runner.

Front locking device

PACKING
1 box = 1 pc.

Back drilling for hook

Pre-bore for rear hook for proper alignment and depth (min. depth = 10 mm)

Use a $\varnothing 6$ mm drill bit
Technical information, see page 10.

Drilling templates for drawers

Fixing the clip on the drawer member

The use of $\varnothing 4 \times 16$ mm screws is recommended for a correct operation of the clips

Vertical drilling for clips, fixing on the bottom

Optional lateral fixing

The use of $\varnothing 4 \times 16$ mm screws is recommended for a correct operation of the clips

Tilt adjustment lever - For all Progressa and Progressa+ runners

AGLRXX3F

PACKING

1 box = 12 pcs right / 12 pcs left

Technical information, see page 27.

Spacer for 12 and 13 mm drawer sub-fronts - For all Progressa and Progressa+ runners

AFSFXXB

For drawer sides with sub-fronts between 12 and 13 mm, we recommend the use of the build-up spacer

PACKING

1 box = 100 pcs

To be used with **AFCGXX3B** front locking device (right and left)

Fix with screws
as indicated
(recommended
wood screw
Ø 6 x 19 mm)

To be used with **AFCGX56B** front locking device (right and left)

Fix with screws
as indicated
(recommended
wood screw
Ø 4 x 20 mm)

Spacer can be fit to any size by breaking tabs

Accessories - For Progressa+ Shelf runners

Rear-fixed bracket and magnet - Lock-open function for runners and drawers

AROSXXY

The shelf is held at the maximum opening position by means of a rear-fixed bracket and a magnet.

PACKING

1 box = 20 magnets, 20 brackets.
Screws included.

Assembly instructions

1 A) Fix the bracket, aligned with the back of the shelf.

1 B) Fix the bracket to the shelf with the rear hook support.
The bracket needs to be aligned to the rear hook support.

2) Fix the magnet to the bottom.

3) The shelf is held at the maximum opening position.

Rear hook bracket

AGAPXXYI

For shelves that are less than 12 mm thick, the runner can be used together with the rear hook bracket, thus eliminating the need for the rear hole in the shelf.

PACKING:

1 box = 100 pcs.

Accessories - For all Progressa, Progressa⁺ and Progressa⁺ Shelf runners**Wood screw****V234X164I**

Wood screw \varnothing 4 x 16 mm

PACKING

1 box = 20000 pcs

Euro screw**V136X114I**

Euro screw \varnothing 6 x 11 mm

PACKING

1 box = 10000 pcs

**V136X154I**

Euro screw \varnothing 6 x 14.5 mm

PACKING

1 box = 5000 pcs
