

SALICE

Exedra Light

Exedra Light

Exedra Light

This pocket door system elevates both versatility and design, featuring a distinctly modern and clean look.

Versatility

A truly versatile solution, it integrates perfectly into multiple applications.

Functionality

A simple yet reliable mechanism that provides complete door retraction into the compartment.

Installing and uninstalling made simple, requiring only a few easy steps.

Flexibility

It can be applied to a wide range of doors and supports up to 18 kg.

Design Flexibility

Exedra Light suits all types of furniture and can be applied to a wide range of dimensions:

- Door height from 700 mm to 1600 mm.
- Door width from 300 mm to 650 mm.
- Maximum usable depth 762 mm.
- Door thickness from 16 mm to 25 mm.
- Door weight up to 18 kg.

Exedra Light

Exedra Light

Design and functionality in perfect harmony

The Exedra Light system integrates seamlessly into multiple spaces, complementing a wide range of furniture, from kitchens, home offices to bar cabinets and laundry rooms.

An innovation that is both stylish and effective combining aesthetics and practicality.

Exedra Light

Exedra Light

Movements developed for maximum ease of use

Two options available:

Out - Doors open independently from within the cabinet with assisted motion, activated by a light touch.

In - The doors retract with a smooth, perfectly balanced motion in response to a gentle push.

Exedra Light is supplied with Smove hinges for a decelerated closing, or with the dedicated release device for Push opening.

Available in nickel-plated or titanium finishes.

A seamless and intuitive mechanism.

The door fully retracts into the compartment when open, ensuring practicality and discreetness.

Each movement is assisted, resulting in a precise and harmonious sliding action.

Simple, reliable, practical

The concealed sliding mechanism, contained within a 55 or 58 mm housing, allows for easy adjustment and access without disassembling the cabinet.

It attaches directly to the cabinet side in just a few simple steps.

Configure your system's movement and accurately calculate door retraction with the online configurator!

Exedra Light

A simple and intuitive purchasing process

Online configurator supports every phase, from design to installation, with detailed instructions and video tutorials.

Supplied in kit form, with minimal adjustments before assembly.

Customised supply available for immediate and easy installation.

Exedra Light

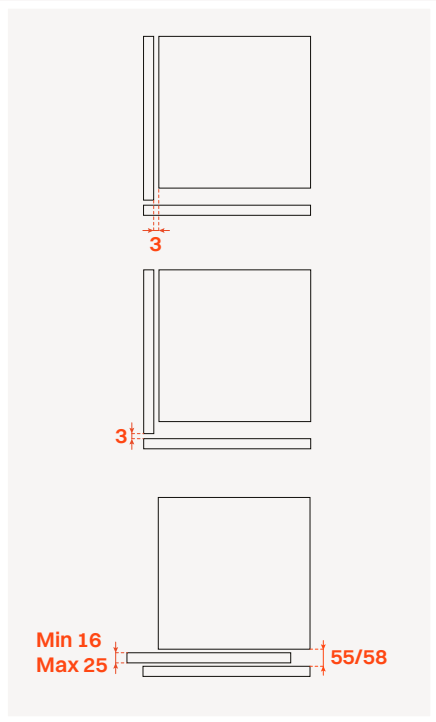

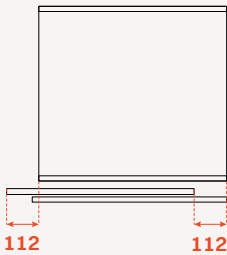

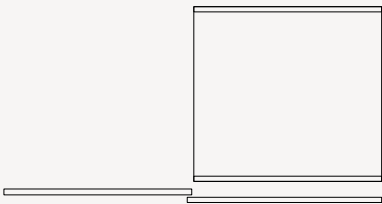

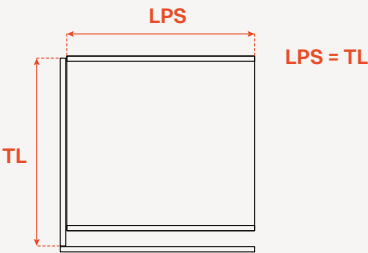

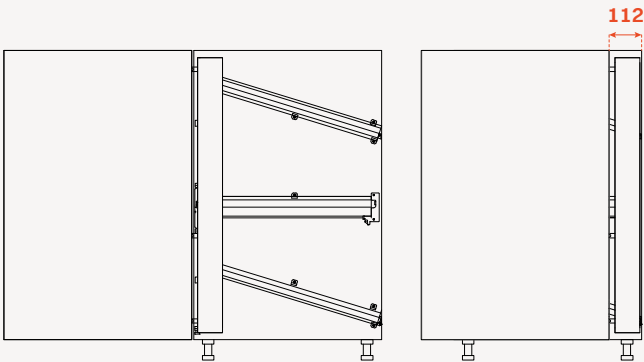

Technical Information

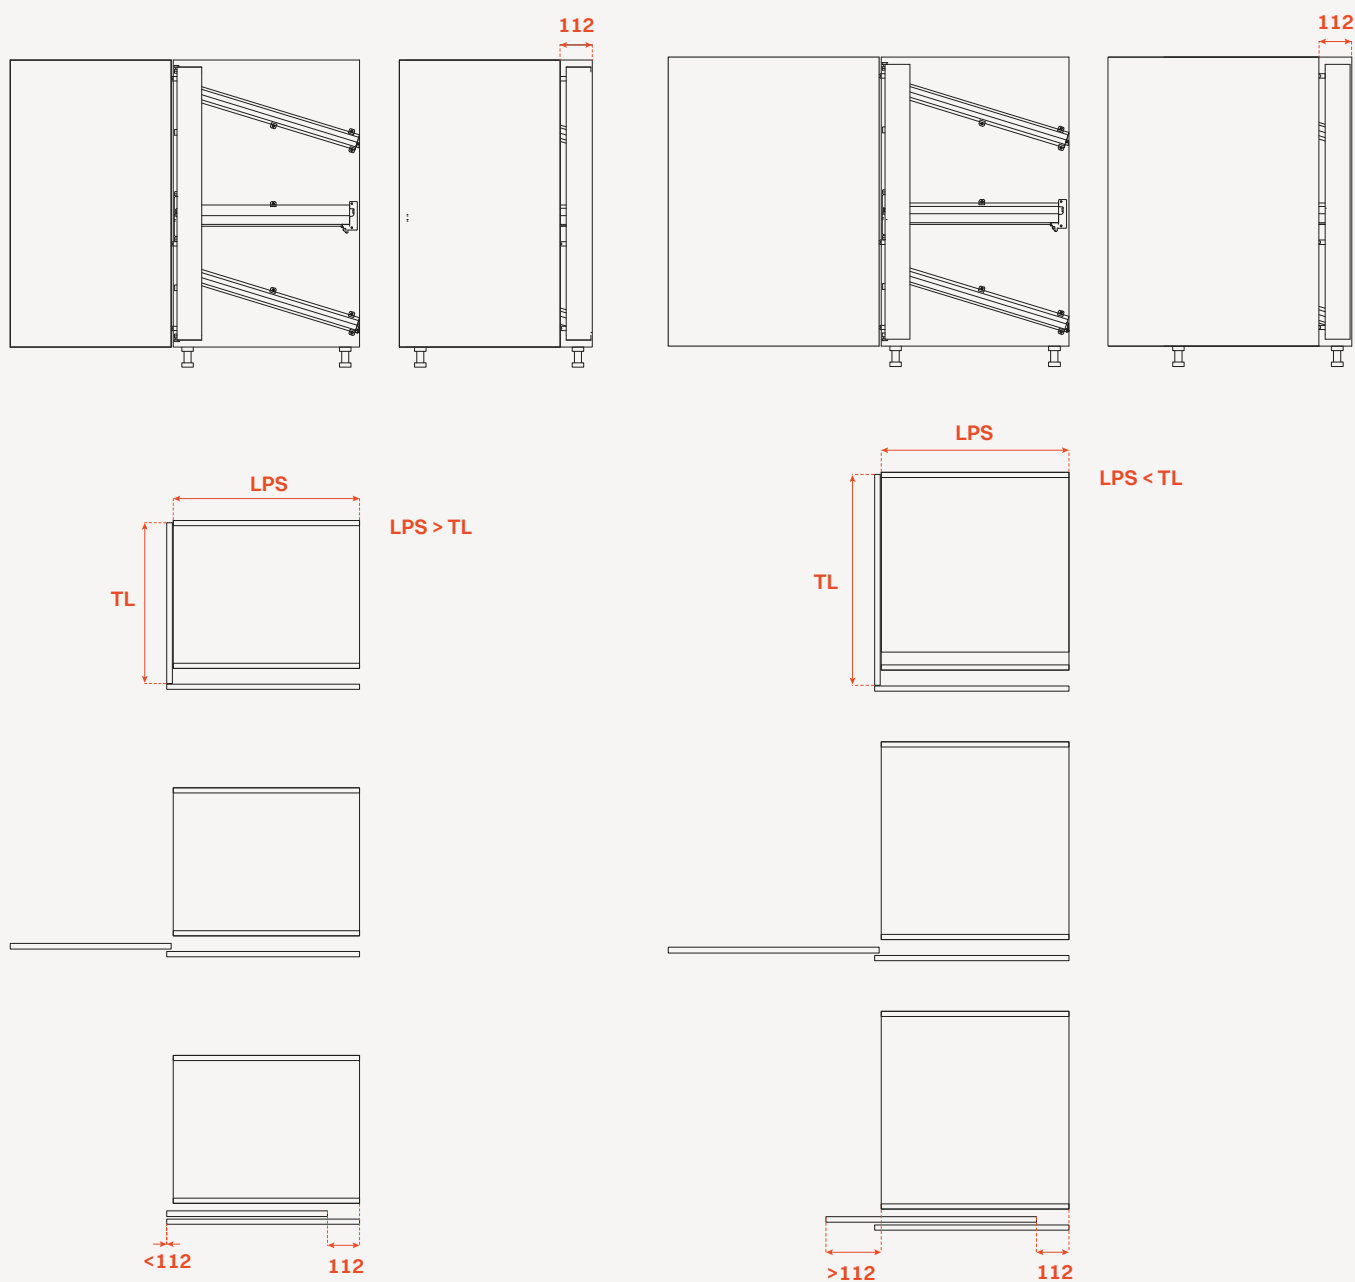

Exedra Light

Door non-retraction

- LPS** Total external depth of the cabinet
TL Door width

The door protrusion is determined by the ratio between the door height and width and by the cabinet depth. It is therefore recommended to always verify the correct protrusion using the online configurator.

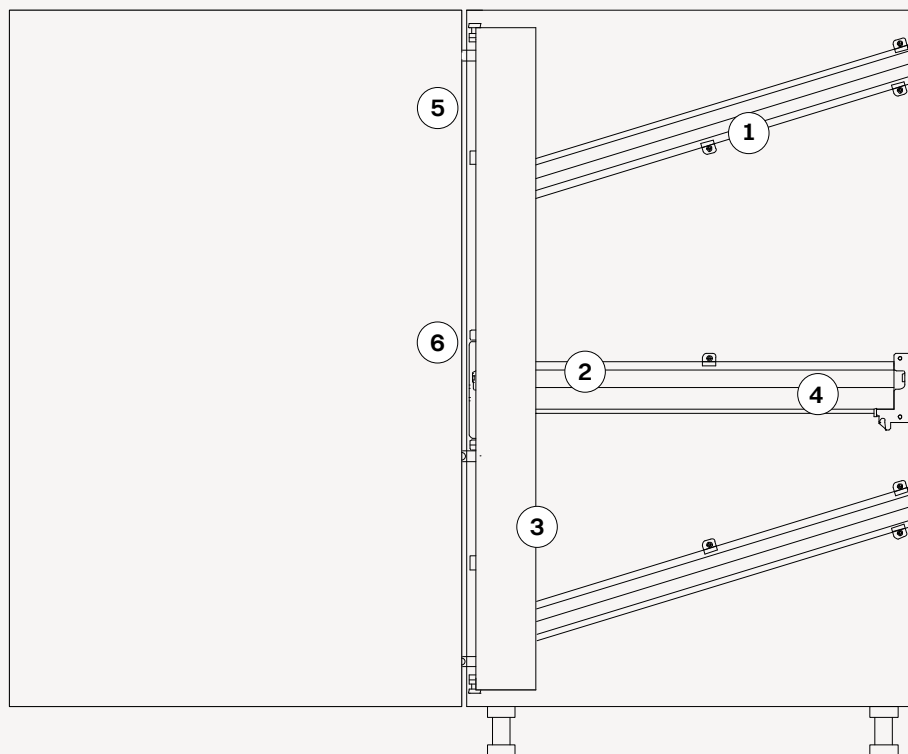

Exedra Light

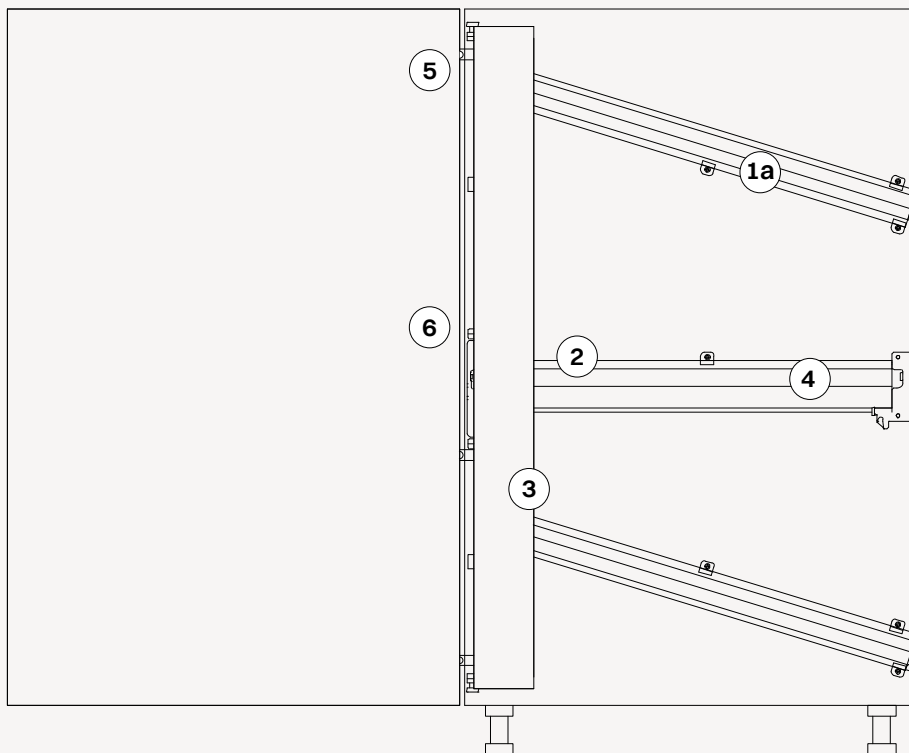

- 1 - **Exedra Light Out:** automatic door extraction movement with a spring.
- 2 - Magnetic buffer for soft insertion.
- 3 - Load-bearing door profile.
- 4 - Sliding carriage profiles.
- 5 - Quick coupling hinges.
- 6 - Door adjustments accessible from the front and from inside the cabinet.

Exedra Light OUT

- 1a - Exedra Light In:** automatic door insertion movement with a spring.
- 2 -** Magnetic buffer for soft insertion.
- 3 -** Load-bearing door profile.
- 4 -** Sliding carriage profiles.
- 5 -** Quick coupling hinges.
- 6 -** Door adjustments accessible from the front and from inside the cabinet.

Kit versions to be assembled

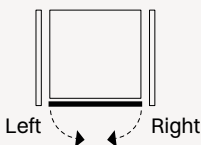

Exedra Light - Out

Kit versions to be assembled

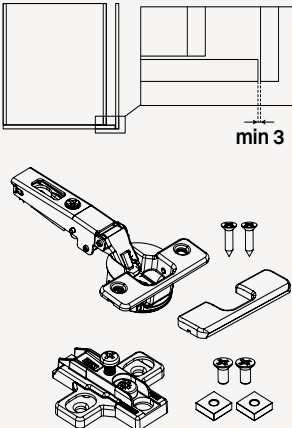

This solution offers a great deal of flexibility to the customer. The customer cuts the profile sections to their desired length and fixes together its individual components. For cutting and assembly operations, please refer to the online configurator. The locating clips and positioning stops ensure a fast and secure assembly.

Exedra Light can be supplied with hinges and Smove, for a decelerated closing. Available in nickel-plated or titanium finishes.
